DECK, HULL, AND MECHANICAL

Solid, FRP laminate hull below the waterline. Corecell coring above the waterline. Vinylester resins in outer layers. Hydraulically - powered bowthruster, windlass and crane, welded stainless steel handrails, aluminum radar mast, Diamond SeaGlaze windows and doors, Volvo-Penta D6 435 hp engine standard. Dinghy and outboard motor included standard!

KEELFORM HULL

The Bracewell 41 has the exclusive hullform that earned Camano yachts their reputation as seaworthy performance trawlers. With a unique keel design and a low center of gravity, the Bracewell 41 cruises comfortably and efficiently at any speed from 8 to 16+ knots, something neither conventional semi-displacement nor planing hulls can achieve.
